NEM 016: total visibility, total opening, total security.

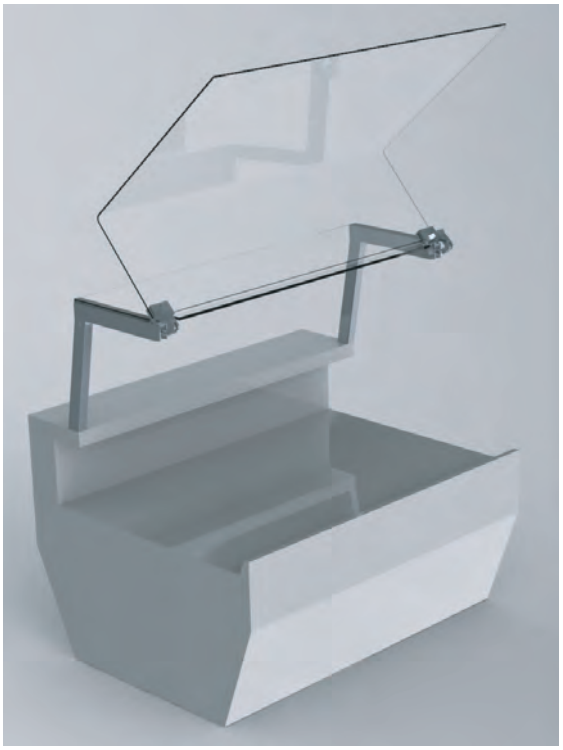
016 System

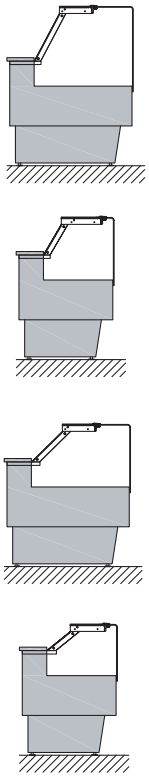
Versatile on any type of counter:

NEM 016 system can be assembled on each type of counter, from the bakery to the butcher's shop. Its conformation allows the direct installation at the counter or on uprights, both NEM brand that produced by the Customer. The model NEM 016 is proposed in silver finish or brill (steel effect), the length of the cases is customizable by a minimum of 265 mm to a maximum of 350 mm.

Rear uprights and glass R20, total visibility:

NEM 016 was created as overstructure on which to apply the new "R20" .This glass applied to the system with rear uprights gives the counter a total visibility of the products. The glass, thanks to its shape, does not allow refractions and distortions and doesn't need additional working, near the hinges notching is not necessary.
The special lateral cases allow the installation of a rear top glass getting a "glass cube" effect.





Total opening, total security: the new system

NEM 016 guarantees a glass opening to about 130°

, allowing comfortable and safe cleaning and loading operations. The particular system of gas rams allows easy opening and a smooth closure avoiding any possible crash.

Built-in-gas rams:

the gas rams when glass is closed are fully inserted into the cases, thus avoiding any contact between the products on counter and the gas rams. This solution also gives an important aesthetic effect to the whole structure.

Aluminium profiles & Crystal opening system for display cabinets.
