New 061 system!

The new 061 lift-up opening system for 6mm linear glasses, springs from 067 system, which has been on NEM Srl's catalogue for some years now.

It is a system which has been devised for large-scale retail distribution and is therefore cheaper than system 067, granting at the same time:

- solidity;
- design;
- functionality;
- accessories.

Thanks to the top shelf support brackets, supplied as optional, the system can be installed with or without top shelf glass; these support brackets are supplemented with special end caps holding the shelf glass.

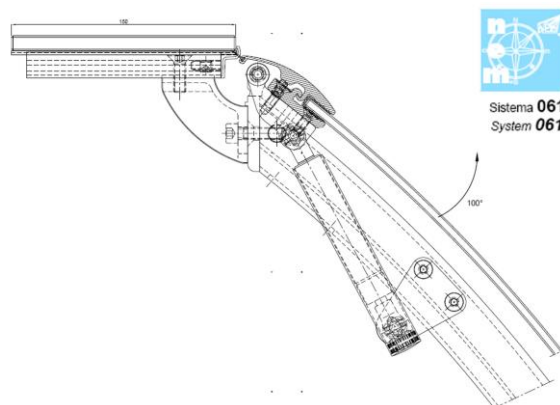

The new 061 system - with its 1016mm- radius and 41,14°-arch development - has been designed and added in NEM's catalogue for the installation of single 6-mm glass and it fits for several requirements.

This new system makes it possible to realize only segmented-corner counters.

The full catalogue will soon be available on our site.

For the availability of the new items and the special prices to you reserved, or for technical informations, please do not hesitate to contact NEM's Research & Development and Sales Departments.

Kindest regards.
