

MARCH 2013

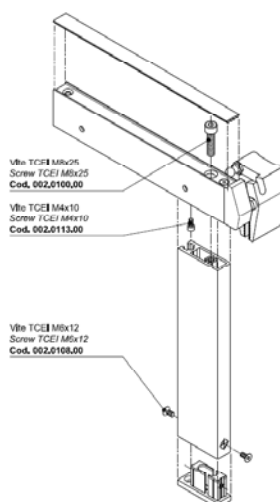

Copyright© 2013 NEM srl - All rights reserved

Dear customers,  
in a view to continuous reserch and improvemet of our products, we've built a new upright, designed according to needs of our customers who use our 080 system.

The code of this **new upright profile** is **080.0007**.

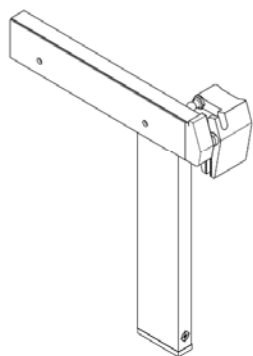

The new upright has the fixing to the ram-holder case right on the profile, with a M8 thread on a hole specially calibrated and already provided on profile's extrusion. This allows to eliminate the currently used tie rod (code 005.0233.00) and having a better looking product.

The code of the **new fixing kit of case on the upright** is **001.00521.00**.

Kit minuteria fissaggio scatola al montante 080 Cod. 001.00521.00  
Kit small parts for fixing case to 080 upright

Kit piastra montante anteriore 080.0007 compl. Cod. 080.2318  
Kit complete plate for 080.0007 front upright

Meanwhile we've produced a new plate for upright fixing to the counter or to the working bench. This new plate is made with a fusion from a mold, that allowed us to reduce the price, all this without degrading the quality and product aesthetics. The code of **new plate kit, including fixing parts** is **080.2318**.

These new products will be on our catalogue during next update in March 2013.  
The old style items will be available in stock only until out of stock.

To get the price for you of new items and their availability and/or technical details, our Sales Dept. and our R&D Dept. will be at your disposal.

We'd kindly remind you that accordingly to what here said, we will not replace items in your stock with lastes serie's products.

Hoping you could appreciate our choice, we give our best regards.
